Dream'E LIFE

Now you can match your Dream'E video-projector with your lifestyle ! The Dream'E *Life* collection has been created for the most audacious interior decorators. Whatever your living-room's dominant tint, there is a Dream'E for you. The Dream'E *Life* products are painted in France, by a supplier of the car industry.

By the way, with this glossy red colour shown here below, you will surely make a connection with another famous red colour, used in the sport and luxury car industry.

Step by step, the DreamVision design team will release some new colors. Specific colors (based on RAL classification) can also be studied on demand. Since the Life collection is assembled and painted in France, it will ship out ex-Paris.

DREAMVISION DREAMBEE2 PROJECTOR

● This megaplex-quality, 1080p projector has an improved lens, a new 3-LCoS light engine and improved image processing. It offers a contrast ratio of 30,000:1 and comes in a range of upbeat colours including sunflower yellow (pictured), sky blue and hibiscus red.

£11,200, www.absolutesounds.com

There's stunning coverage for the DreamVision DreamBee 2 in the latest issue of T3, the March 2009 edition. The projector gets a full page to itself, with stunning photography of the 'Sunflower Yellow' model, some appropriate words and Absolute Sounds' website address.

PPA International Consumer Magazine of the Year, T3 uses stunning photography and a powerful blend of news, reviews and features to bring its readers bang up-to-date with everything that's happening in the fast-paced world of consumer technology. T3 is licensed in 21 countries with over a million-strong European reach, while its growing UK readership alone is now over 220,000 potential customers every month. It has become the world's leading authority on all things gadget related, bringing all the latest developments, in-depth reviews, outrageous features and an all-new buyer's guide.
